

## Beaver Management Program

The Council for the RM of Meadow Lake, through SARM, has a Beaver Management Program.

This program assists the RM financially to manage our Beaver Population by way of hiring trappers.

Presently the Council has 2 individuals who are contracted to assist in this program.

However, we have found that the program is in need of further assistance and therefore the RM of Meadow Lake has passed a resolution that they will accept beaver tails for a price of \$50.00 per beaver tail. The maximum a trapper can submit in on 1 week (seven-day period) is 25 tails.

Prior to the RM accepting and paying for the tails, the following must be met:

1. A valid trappers license must be presented;
2. A letter of consent to access property by the land owner;
3. A list of land locations where the beaver tails were obtained listing the number of tails obtained per location.
4. Tails will be bagged with a serial number provided by the RM of Meadow Lake #588.

Anyone wishing to bring in beaver tails must register at the office first. A drop off box will be designated in which trappers will have access to from Tuesday and Thursday, 9am to 4pm. To obtain a serial number, trappers need to come into the office with their Trapper's license. The remainder of the paper work required shall be placed in a Zip-loc bag in the bag of beaver tails and sealed with the serial number provided by the office. The Manager of Public Works shall look through the paperwork for final approval. The invoice is then brought in to the RM office along with the required paper work.

The letter of consent form, list of land location forms and contact information can be obtained from the RM of Meadow Lake #588. Call the RM office at 306-236-5651, if you have any further questions.
